SHARMILA (DAS) RAMMOHAN

Knowledge Management and AI Content Strategy Leadership

San Jose, CA | das.sharmila@gmail.com | sharmiladas.github.io | github.com/sharmiladas

PROFILE

Knowledge management and technical content leader with 15+ years building enterprise knowledge systems and 10+ years leading global teams of up to 30 people. Combines content strategy, information architecture, CMS product strategy, governance, and technical program management. Led quality automation across 170M+ words of AWS documentation each month and a global knowledge organization at LinkedIn. Develops structured content, retrieval requirements, and evaluation practices that connect trustworthy information to customer and developer needs.

CORE EXPERTISE

Enterprise knowledge strategy • Content models, taxonomy and metadata • Lifecycle governance • Global people leadership • Developer and API documentation • CMS modernization • AI workflow design and evaluation • Search and retrieval • Cross-functional program execution • Business cases and measurement

PROFESSIONAL EXPERIENCE

Senior Technical Program Manager, Tech Docs and CMS

Amazon | Jul 2025–Present

- Lead 12 connected workstreams across Product, Engineering, Data Science, UX, QA, Solution Architecture, and technical content; align documentation, knowledge, platform, and AI requirements across five content surfaces.
- Direct CMS and knowledge-platform modernization, including requirements, business case, build-versus-buy analysis, vendor evaluation, content modeling, migration planning, governance, and adoption.
- Define content schemas, taxonomy, metadata, source mapping, versioning, provenance, and quality requirements for search, RAG, chat, and contextual developer guidance; map reusable content to customer journeys.
- Coordinate owners, milestones, dependencies, release calendars, and a shared Definition of Done; use executive reviews, dashboards, and decision records to resolve delivery risks and investment tradeoffs.
- Developed a knowledge-graph and MCP agent proof of concept in a hackathon to explore relationship-aware retrieval and governed sources for agent workflows.

Senior Technical Program Manager, Technical Communications Experience

Amazon Web Services | Oct 2022–Oct 2025

- Led product strategy, roadmap, and cross-functional delivery for Content Advisor, an AI-enabled quality platform using Acrolinx signals across 170M+ words of developer documentation monthly.
- Translated editorial standards into implementable rules, exceptions, acceptance criteria, and targeted human review. Measured quality improved from 65% to 85%; representative document review time fell from four hours to one.
- Improved suggestion accuracy 40%, reduced false positives 60%, and reached 85% acceptance, using quality findings to prioritize Engineering and Documentation improvements.
- Introduced generative-AI and Q CLI workflows for drafting, editing, transformation, and maintenance; reusable instructions, source validation, and specialist review reduced transformation time from eight hours to four.
- Standardized content models, templates, metadata, and structured authoring; coordinated migration dependencies, versioning, release gates, audit trails, defect resolution, and post-release validation.

PROFESSIONAL EXPERIENCE CONTINUED

Senior Manager, Digital Service Design and Content Strategy

Eventbrite | Oct 2021–Aug 2022

- Led content designers and strategists shaping the Help Center and self-service experience through customer journeys, information architecture, taxonomy, navigation, search, and reusable content patterns.
- Partnered with Product, UX, Research, Engineering, and Customer Service to turn research, support trends, search behavior, and feedback into prioritized content and platform requirements.
- Managed the roadmap, production workflow, release schedule, QA, and content versioning; established governance and measurement for findability, comprehension, and task completion.

Senior Manager, Knowledge Management and Content Strategy

LinkedIn | Jul 2019–Sep 2021

- Built and led a 30-person global organization spanning content strategy, content engineering, and localization, supporting 1.5M+ customers and 2M+ weekly sessions across 12 languages; hired, coached, and established ownership and career growth paths.
- Created a shared knowledge strategy across Marketing, Sales, Support, Product, Engineering, and Creative, with content standards, accountable owners, review workflows, repositories, lifecycle governance, and publishing processes.
- Led headless-CMS and structured-content transformation through audits, information architecture, taxonomy, metadata, content models, and reusable delivery across channels. Publishing became 50% faster and reuse increased 35%.
- Established measurement through Google Analytics, Tableau, surveys, A/B testing, and support signals. Support cases fell 15%, vendor costs fell 27%, CSAT improved 10%, and weekly sessions grew 17%.

Senior Manager, Content Strategy and Technical Documentation

Thermo Fisher Scientific | Jul 2017–Jul 2019

- Hired, mentored, and led an 18-person global team supporting enterprise cloud products; synchronized developer and user documentation, deployment and administration guides, e-learning, video, and interactive guidance with product releases.

Senior Manager, Technical Writing

Cadence Design Systems | Feb 2016–Jul 2017

- Led 12 engineers and writers producing API, architecture, developer, and release documentation for semiconductor design software; owned staffing, schedules, technical reviews, editorial quality, and multi-version delivery. Applied content gap analysis and competitive research to content strategy and customer enablement.

Senior Manager, Technical Writing

Synopsys | Oct 2009–Jan 2016

- Built and led a global organization of up to 30 engineers and writers delivering developer guides, references, tutorials, online help, and technical training. Migrated documentation to DITA/XML and version-controlled single sourcing to improve reuse and consistency across product versions and channels.

SELECTED PORTFOLIO WORK

Published Content as a Business Asset and Building an AI Content Quality Lab, with frameworks for structured knowledge, business measurement, source quality, grounding, and human review. Developed knowledge-graph and AI technical-writing learning modules, architecture diagrams, and implementation guides. Portfolio: sharmiladas.github.io.

EDUCATION AND TOOLS

MBA, Pepperdine Graziadio School of Business • B.E., Electrical and Electronics Engineering, Bharathiar University • Post-Graduate Certificate, Data Science, UT Austin • Software Engineering Certificate, UC Berkeley, in progress

Acrolinx and Content Advisor • Contentful • Adobe Experience Manager • DITA/XML • Markdown and Git • Jira and Aha! • Confluence and SharePoint • REST APIs • Python and SQL • Google Analytics and Tableau • Generative AI • LLM evaluation • RAG • Knowledge graphs • MCP
