

SHARMILA DAS

AI KNOWLEDGE SYSTEMS & CONTENT STRATEGY LEADER | PLATFORM TRANSFORMATION | GOVERNANCE

San Jose, California | [linkedin.com/in/sharmila](https://www.linkedin.com/in/sharmila) | github.com/sharmiladas/Content-Strategy

PROFILE

Director-level content strategy and technical program leader with 15+ years building the systems behind trustworthy, scalable content and knowledge experiences. Leads multi-year strategy across AI-enabled content operations, knowledge architecture, structured content, CMS/platform transformation, governance, quality automation, localization, and cross-functional programs.

LEADERSHIP SCOPE

- AI content strategy, RAG/knowledge architecture, evaluation frameworks, provenance, and risk-based human review
- Multi-year content and knowledge strategy; customer-journey architecture; taxonomy, metadata, and content models
- CMS strategy, build-vs-buy analysis, platform migration, structured authoring, and API-ready knowledge delivery
- Complex program leadership across product, engineering, content, creative, localization, operations, and executives
- Governance at scale: standards, automated checks, ownership, lifecycle, measurement, adoption, and feedback loops

SELECTED IMPACT

65% → 85%	Content quality improvement through automated guidance and quality checks
~4h → ~1h	Representative review-cycle reduction through AI-assisted quality workflows
12	Parallel workstreams coordinated in a complex content-platform transformation
12 languages	Structured global marketing model designed for reusable, localized content

SELECTED EXPERIENCE — ANONYMIZED PUBLIC VERSION

Senior Technical Program / Content Platform Leadership — Global Technology

- Led a net-new content-platform and operating-model program spanning 12 workstreams across strategy, content model, authoring, platform, migration, governance, delivery, measurement, localization, enablement, AI-assisted transformation, and adoption.
- Built business cases and build-vs-buy frameworks around customer need, time-to-value, capability, risk, total cost, and strategic differentiation.
- Advanced knowledge architecture for developer/customer experiences spanning site, search, conversational interfaces, RAG, and emerging agent/MCP patterns.

Senior Content Strategy Leadership — Cloud Technology

- Translated editorial and content standards into automated quality guidance, improving quality from roughly 65% to 85% and reducing representative review time from about four hours to one.
- Developed structured-content patterns and AI-assisted transformation approaches to make technical knowledge more reusable and machine-readable.

Content Strategy & Knowledge Leadership — Professional Platform

- Built a multi-year strategy that treated content as a business asset and moved from page-based production toward reusable, structured knowledge.
- Defined audience, key message, value proposition, proof, product information, CTA, metadata, and content-type patterns while preserving creative ownership.
- Designed for headless delivery, cross-channel reuse, analytics, and localization across 12 languages.

Knowledge Management Leadership — Global Consumer Platform

- Drove a three-year strategy from fragmented support content toward governed, structured, reusable, contextual knowledge.
- Established a roadmap across ownership, taxonomy, content models, lifecycle controls, publishing governance, self-service, reuse, automation, and intelligent delivery.

Earlier Leadership — Enterprise Software, Semiconductors & Life Sciences

- Led technical content, knowledge management, structured authoring, taxonomy, localization, and documentation transformation initiatives.

AI / KNOWLEDGE SYSTEMS

- Governed RAG: authoritative knowledge, metadata filters, semantic/keyword retrieval, relationships, source authority, versioning, reranking, and context construction
- AI quality: groundedness, factual accuracy, audience relevance, strategic fidelity, brand fidelity, message consistency, policy, clarity, and value
- Knowledge graphs / GraphRAG concepts; structured content; taxonomy; metadata; headless CMS; developer knowledge systems
- Portfolio RAG Quality Lab with quality rubrics, human-labeled gold set, failure injection, and judge-vs-human evaluation

EDUCATION

B.E., Electrical & Electronics Engineering.
